

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

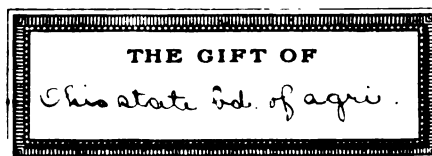

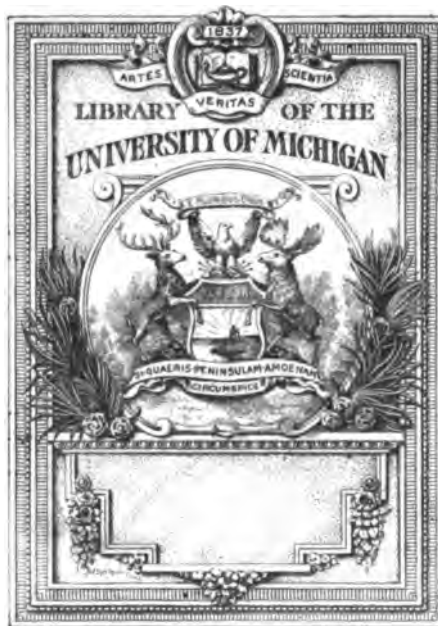

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

ADMINISTRATION BUILDING, STATE FAIR GROUNDS,  
COLUMBUS, OHIO, August 29, 1911.

The State Board of Agriculture met Tuesday, August 29th, 8:30 p. m., with the following members answering to roll call: Ganson, Beidler, Cross, Cromley, Lybarger, Ewart and Dean.

Secretary Sandles presented to the Board the matter of the arrest of J. T. Windhorst, with whom contract had been made by the Board for lighting of grounds and buildings, for placing of gasoline tanks in too close proximity to buildings.

It was the sense of all members of the Board that the Secretary should be authorized to consult with Attorney General Hogan and matter left to him for adjustment.

Moved by Mr. Beidler that said petition be accepted and that matter be left in hands of Secretary for preparation of suitable reply declining to grant said request. On roll call motion carried.

Columbus, O., Aug. 29, 1911.

To the State Fair Exhibitors who have requested the Ohio State Board of Agriculture to rescind its rule made to the effect that no passes should be issued:

At a called meeting of the Board, Tuesday afternoon, August 29th, 1911, it was the unanimous opinion of the Board that since its rules had been published and all exhibitors fully informed as to our rules and conditions, before making entries, and in view of the fact that 98 per cent. of the people of Ohio are opposed to certain individuals receiving free passes, and in view of the fact that the free pass system is a curse to any institution and abused flagrantly when it is in vogue, and in view of the fact that although our premium list carried notice to all that no passes would be issued, more entries have been received and more exhibits are on the grounds than at any previous Fair, and that application for space had to be turned down because of lack of room, and in view of the fact that our concession men having due notice that no passes would be issued, still bid a higher price for privileges than ever before, and in view of the fact that newspaper men do not receive any special favors,

Therefore, no change or alteration in our present rules are deemed advisable.

Respectfully,

[Signed] A. P. SANDLES, Secretary.

No further business, the Board adjourned, to meet at call of the President.

DEPARTMENT OF AGRICULTURE,  
COLUMBUS, OHIO, September 13, 1911.

Committee on Grounds and Buildings met in session Wednesday, September 13th, at call of President Ganson.

The Secretary advised the committee that E. D. Wise, contractor for drilling of well on Serum Farm, had requested this committee to inspect said well, which he reported as being 208½ feet deep. Thereupon the committee visited and inspected said well. The water pumped was of sufficient quantity, but so muddy as to be unfit for use. After consultation the committee authorized Mr. Wise to pump said well constantly until further notice, or until water pumped was clear, in such case pumping to be stopped for ten hours and then resumed until further notice. Mr. Wise to be compensated for such pumping at seventy-five cents per hour, he to furnish all labor and material. Committee authorized the Secretary to issue order for \$200 in favor of Mr. Wise, as payment on account.

Committee also inspected tile drainage work now in course of construction on said Serum Farm, and found the main outlets practically completed and work progressing satisfactorily.

Committee returned to the office and authorized the Secretary to advertise for bids for the construction of State Serum Farm buildings, in accordance with plans and specifications of architects, Dawson & Holbrook; also to advertise for bids for the erection of an addition to the sheep barn at State Fair Grounds. Bids to be received up until 10 a. m., standard time, October 11, 1911.

Committee instructed Secretary to ask Dawson & Holbrook to prepare preliminary plans and estimates for an inexpensive greenhouse, to be constructed on the State Fair Grounds, use to be made of such old material as may be found on the grounds.

Secretary was instructed to request Dawson & Holbrook to submit estimate on the cost of removing old Press Club Building to a more suitable location on the grounds, and remodeling of same.

Architect Holbrook, being called into conference, stated that Mr. Cohagen, contractor on addition to Cattle Building, will complete such building by October 1. Mr. Holbrook further states that new Fire Engine House is complete in every respect.

Committee instructed architect to submit an estimate on covered walks similar to those now constructed, to connect central group on State Fair buildings with the Live Stock buildings.

Committee asked architect to inspect the roofs of the several State Fair buildings and report at next meeting of Board.

Minutes of this committee were read and approved, and upon motion of Mr. Cromley, seconded by Mr. Sandles, same were approved.

No further business, the committee adjourned at 4:00 p. m..

DEPARTMENT OF AGRICULTURE,  
COLUMBUS, OHIO, September 26, 1911.

Meeting called to order by the President at 10 a. m. Present: Ganson, Cromley, Kilgore, Farnsworth, McFarland, Dean and Cross. Absent: Beidler, Ewart and Lybarger.

Minutes of the meeting of the Grounds and Buildings Committee, September 13, were read and approved.

In the matter of constructing the well on the Serum Farm, the committee reported that the well had been pumped for one hundred and twenty-nine hours, and the water therefrom was still muddy. Mr. Wise, contractor for drilling said well, presented an itemized bill for \$693 for services; 208½ feet at \$2.50 per foot, \$521.25, \$75 for extra labor account installing and withdrawing strainer, and 129 hours pumping at 75 cents per hour, \$96.75.

On motion of Mr. Cross, seconded by Mr. Dean, the settlement of said bill and further work to secure clear water was referred to the Committee on Grounds and Buildings. Carried unanimously.

Mr. Holbrook presented a report on proposed improvements at the State Fair Grounds, as directed at the last meeting of the Board, which report was read by the Secretary, as follows:

ARCHITECT'S REPORT OF INSTRUCTIONS GIVEN HIM AT LAST COMMITTEE  
MEETING.

To the Ohio State Board of Agriculture.

Gentlemen: I have investigated the condition of the roof of the Art Hall and find that it must have an entire new roof, gutters and flashings at once, as the tin and metal is completely rotted away and the plaster ceiling is being destroyed by every rain. It will cost \$417 to replace the roof and \$40 additional to sheet the roof which is necessary, as there is no sheeting now on roof, simply corrugated iron stretched from wide supports.

If the buildings are to be used for a Mid-winter Fair then repairs to the slate work will be needed and will cost about \$100 to execute, otherwise let the roofs as they are until next spring.

Funds should be left to repair all of the roofs of the main buildings.

Removal of Press Club:

I earnestly request the removal and wrecking of the press club building and the space parked, that is in the interest of progress, as the old building is unsightly and out of keeping with other surroundings. This building is in a bad state of repair, the roof is in bad condition and on account of the size of the building cannot be moved as an entirety, as we would have to cut down scores of trees to effect its removal.

The salvage of the old lumber will justify the tearing down of this structure.

Greenhouse:

I submit a small sketch of a greenhouse to take care of the Fair Ground supply of plants, this will cost from \$1,900 to \$2,400 according to the amount of old glass that can be salvaged from the old materials on the grounds.

Covered Walks:

I would advise that the style of covered walks from the main group to the sheep barn or grand stand be changed to a more artistic character.

As this is the best part of the ground I would advise of a pergola style, using large

cement round columns and heavy projection of eaves, and by the judicious use of trailing vines we could turn this into a feature of a large arbor, etc. Cost \$7,000 to \$10,000 according to length.

Would advise that some of the old lumber be hauled to the Serum Farm to take care of necessary small sheds for temporary purposes.

Advise the advertisement of old building material for sale at the Fair Ground. We have a large collection of building junk that is worthless for our use, but can be of some use to others.

Yours truly,

Signed:

Sept. 26th, 1911.

DAWSON & HOLBROOK, Architects.

Moved by Mr. Kilgore and seconded by Mr. Dean that an appropriation of \$25 be made for prizes for the Farm Boys' essays, and Secretary instructed to procure same. Motion carried unanimously.

## Crop and Live Stock Statistics

AS ESTIMATED BY THE

## Ohio Department of Agriculture

From Returns Received from its Corps of Regular Township Crop and Stock Correspondents During the Year 1910

The Division of Crop and Stock Statistics is one of the most important of this Department, having some fifteen hundred volunteer correspondents and an efficient corps of clerks to promptly compile and publish these statistics.

The chief purpose of these reports is to give the farmer information that will aid him in disposing of his crops and stock to best advantage. That this may be accomplished special advance sheets are monthly furnished the press of the state and leading agricultural journals of the country, while later the detailed report giving results by counties is issued and widely circulated.

Published herein are the monthly reports which have special reference to acreage or the total estimated production for the State. Following these reports will be found tables showing wheat and corn production from 1850 to the present year, inclusive, together with a range of prices, the average prices for each year, and the same by a series of ten years; tables showing the number of live stock in the State as returned to the Auditor of State; agricultural statistics as returned to the Secretary of Agriculture by county auditors, and ten-year comparative tables of the different crops of the state.

WHEAT—Condition compared with an average.....	87 per cent.
OATS—Area for 1910 as returned by township assessors.....	1,441,957 acres.
“ —Area sown this year compared with 1910.....	94 per cent.
“ —Estimated area for the harvest of 1911.....	1,357,224 acres.
SPRING BARLEY—Area sown compared with last year.....	93 per cent.
WINTER BARLEY—Condition compared with average.....	85 per cent.
BARLEY—Total area:	
“ —Sown last fall.....	19 per cent.
“ —Sown this spring.....	81 per cent.
RYE—Condition compared with average.....	90 per cent.
CLOVER—Average date of seeding.....	March 25.
“ —Acreage sown compared with last year.....	96 per cent.

BERRIES—Prospect compared with normal yield.....	93 per cent.
LIVE STOCK—Losses during winter and spring:	
“ “ —Horses .....	2 per cent.
“ “ —Cattle .....	1 per cent.
“ “ —Sheep .....	3 per cent.
“ “ —Hogs .....	3 per cent.

Ohio's present wheat prospect is encouraging. Area is greater and growing condition better than one year ago. On April 1 condition of wheat was estimated at 84 per cent., compared with an average.. During the past month it has gained 3 per cent., its condition being now estimated at 87 per cent. On the corresponding date one year ago condition was estimated at 85 per cent. Some correspondents note damage by cold, wet weather, but for the state as a whole the condition of the plant is most promising. The estimated damage by Hessian fly and insect pests is slight.

Weather conditions during April were most unfavorable to oats seeding. Rainfalls were frequent during a greater part of the month.

A large area remains unseeded at this time. The estimated area now reported is 1,357,224 acres, or 94 per cent., in comparison with the 1910 area returned by the township assessors. Should weather conditions remain unfavorable, much of the ground intended for oats will be abandoned to that crop and put to corn. No, doubt, however, the actual area seeded to oats will be much greater than the estimate now reported.

The condition of rye is estimated at 90 per cent., compared with an average.

The acreage of clover is estimated at 91 per cent., compared with the area seeded last year.

Fruit prospects are estimated at 91 per cent., compared with a normal yield. The following report on fruit is furnished by the Nursery and Orchard Division of this Department:

“Inspectors’ observation shows that throughout southeastern Ohio and river counties east of Scioto, apple orchards on hill land have a very light setting of fruit buds, undoubtedly due to drouth of July and August of preceding year. In central and southwestern Ohio, where apples were a total failure last year, promises are for a full crop. Frost has destroyed about 80 per cent. of peach buds, early-blooming pear, plum and cherry, throughout central and southern Ohio. All kinds of fruit in northern and eastern Ohio in good condition and no injury reported.”

CATTLE—Condition compared with an average.....	94 per cent.
CALVES—Number compared with an average.....	94 per cent.
WOOL—Clipped compared with last year.....	94 per cent.

Since the issuance of the June report wheat shows a further decline of 4 per cent., the prospect being now estimated at 84 per cent. The report shows that the crop has suffered a damage of 5 per cent. by joint worm. There are also many complaints of damage by Hessian fly. Of

the original area seeded, 2 per cent. was plowed up in the spring. It is now estimated that 1,990,727 acres will be harvested. This should produce approximately 25,083,160 bushels.

Rye prospect is estimated at 86 per cent.

Oats show the same prospect as reported one month ago—76 per cent. This crop has suffered severely by the long-continued drouth. The harvest will be short from fifteen to twenty million bushels in comparison with the production of last year.

The area planted to corn is estimated at 2,986,625 acres. This is a decline of 2 per cent. in comparison with 1910 area.. The crop generally is very uneven. Its growth was retarded by drouth. Recent rainfalls have been very beneficial. Its present growing condition is estimated at 89 per cent. Cut and grub worms have damaged corn to the extent of 11 per cent. One year ago the growing condition of plant was estimated at 83 per cent.

Area planted to potatoes is estimated at 130,690 acres. Growing condition, 78 per cent. On corresponding date one year ago growing condition was estimated at 93 per cent.

Pastures are in very poor condition, due to severe drouth.

Timothy prospect estimated at 61 per cent.

Ohio's estimated wheat production for harvest just passed was 31,092,382 bushels. This is an approximate shortage of 136,000 bushels, compared with the estimated production of one year ago. The average production per acre is 15 bushels. The quality of the grain is estimated at 94 per cent., compared with an average. The crop of 1910 still remain-

ing in producers' hands is estimated at 11 per cent. Ohio should not produce less than 40,000,000 bushels of wheat annually, but until a marked increase is shown in the area seeded this cannot be accomplished.

While the area seeded to oats for 1911 harvest was somewhat greater than in 1910, the total production does not equal last year's crop. The present estimated production is 46,442,742 bushels, as against an estimated production of 54,094,054 bushels one year ago. The quality of the grain is estimated at 88 per cent., compared with an average. The average production per acre is 31 bushels.

Based upon 35 bushels per acre representing normal—100 per cent.—correspondents estimate the corn prospect at 91 per cent. Reports from township assessors show that 3,043,604 acres were planted to corn. From the prospect now reported this should produce approximately 96,938,787 bushels. On the corresponding date one year ago the production was estimated at 87,156,178 bushels.

Potatoes are a failure. The prospect for the state as a whole is estimated at 52 per cent., compared with 1910 production. Sixteen counties report prospect at less than 35 per cent., while in but twelve counties is prospect reported at better than 70 per cent. The failure of this crop is attributed to the serious drouth.

Ohio's apple crop is most bountiful. Compared with last year the prospect is estimated at 125 per cent. The awakening of the people to the good effects following scientific orcharding is shown in the present apple harvest.

Ohio again reports a wheat area of less than two million acres. Compared with the acreage of 1911, as reported by the township assessors, official correspondents of this Department estimate that the area seeded for 1912 harvest is 94 per cent., or 1,915,758 acres. In a great measure the small acreage is attributed to excessive rainfalls at proper seeding time, resulting in the abandonment of many fields intended for wheat. Seeding generally was retarded, due to same cause. The average seeding date was October 3. There is some little complaint of damage by fly to early-sown wheat. The growing condition of the plant is estimated at 96 per cent., compared with an average. On the corresponding date one year ago condition was estimated at 102 per cent.

The report shows 20,700 acres in alfalfa. The average total production per acre from all cuttings is estimated at 3.8 tons, giving a total production for the state of 77,999 tons. Hamilton county is the leading producer of this crop. From 2,172 acres, 6,516 tons were harvested.

In comparison with last year's acreage, rye shows the same percentage estimate as wheat—94. Its growing condition is reported at 96 per cent., compared with an average.

Corn prospect has slightly declined since one month ago, at present time being estimated at 90 per cent. Reports of damage by molding in shock are very general over the state.

The area planted to potatoes is approximately 32,000 acres less than that of last year. The average production per acre is 13 bushels less than in 1910, while the total production for the state as a whole shows a decrease of more than 4,000,000 bushels in comparison with last year's crop of 12,200,376 bushels. Correspondents estimate that 6 per cent. of the crop is affected by rot.

Hog cholera is prevalent in many sections of the state. The general condition of swine is estimated at 94 per cent., compared with an average. In comparison with last year the number of animals being fattened for market is estimated at 91 per cent.

OFFICIAL REPORT .  
OF THE  
Ohio Department of Agriculture  
December 1, 1911.

The following report is computed from returns received from 1,077 of the official correspondents of the Department:

WHEAT—Condition compared with an average.....	83 per cent.
“ —Amount of crop of 1911 sold as soon as threshed.....	45 per cent.
“ —Damage to growing crop by Hessian fly.....	4 per cent.
“ —Damage to growing crop by white grub worm.....	1.6 per cent.
CORN—Area planted in 1911 as returned by township assessors..	3,048,194 acres.
“ —Estimated average yield per acre of shelled corn.....	35.9 bushels.
“ —Total estimated product for 1911.....	110,618,956 bushels.
“ —Crop of 1911 put into silo.....	5 per cent.
“ —Average date cribbing began.....	October 20.
CLOVER—Area sown in 1910 cut for seed.....	16 per cent.
“ —Average yield of seed per acre.....	1.25 bushels.
APPLES—Probable total yield compared with last year.....	165 per cent.
TOBACCO—Probable average product per acre.....	887 pounds.
CATTLE—Number being fed for spring market compared with an average .....	59 per cent.
SHEEP—Number fed for mutton compared with an average.....	51 per cent.

The condition of wheat is far from satisfactory or encouraging. The extreme and long-continued wet weather has prevented growth, and the plant is now, very generally, weak and thin on the ground, and far from being in proper condition for going into winter. While there are some fairly bright and healthy looking fields, a great many are still bare, and some with no prospect of life. The plant has gone back 13 per cent. since the report of November 1, and fly is now reported from every county in the state except Ottawa, damage ranging from 1 to 16 per cent. The average for the state is 4 per cent. The present prospect for the wheat harvest of 1912 is quite discouraging, and should the winter be severe there will probably be another reduction of wheat area by plowing up in the spring.

The corn product for 1910, as returned by township assessors, was 105,512,245 bushels. The estimated product for the present year, as shown in this report, is 110,618,956 bushels, an increase as compared with last year of 5,106,711 bushels. The estimated average yield per acre was 35.9 bushels. Corn husking was greatly retarded by the continued wet

weather, and reports are general of mold and rot. It is estimated that 5 per cent. of the crop was put into silo. The average date of cribbing was October 20.

Cloverseed reported in many sections as a complete failure. The average yield per acre is reported at 1.25 bushels.

Lack of killing frost in spring and failure previous year, allowing good fruit bud development, and increased interest in spraying, are responsible for large apple crop this year. Probable total yield compared with last year, 165 per cent.

Tobacco production per acre is estimated at 887 pounds.

Owing to high price of feed, cattle have been sold off close. Compared with an average, the number of cattle being fed for spring markets is estimated at 59 per cent.

Following is a summary of totals and averages of corn and average per cent. on condition of wheat in different sections of the state:

NORTHEAST—CORN—Total production 16,687,035 bushels; average production per acre, 34.6 bushels.
WHEAT—Condition 80 per cent.
SOUTHEAST—CORN—Total production 10,381,385 bushels; average production per acre, 31.8 bushels.
WHEAT—Condition 85 per cent.
NORTHWEST—CORN—Total production 48,110,906 bushels; average production per acre, 37.7 bushels.
WHEAT—Condition 90 per cent.
SOUTHWEST—CORN—Total production 35,439,631 bushels; average production per acre, 35.9 bushels.
WHEAT—Condition 76 per cent.
EAST HALF—CORN—Total production 27,068,420 bushels; average production per acre, 34.5 bushels.
WHEAT—Condition 81.7 per cent.
WEST HALF—CORN—Total production 83,550,536 bushels; average production per acre, 36.9 bushels.
WHEAT—Condition 84 per cent.
NORTH HALF—CORN—Total production 64,797,940 bushels; average production per acre, 37.5 bushels.
WHEAT—Condition 85 per cent.
SOUTH HALF—CORN—Total production 45,821,016 bushels; average production per acre, 34.9 bushels.
WHEAT—Condition 80 per cent.

From the above summary it will be seen that in the quarter sections the northwest leads in total and average production per acre of corn, also having highest per cent. on condition of wheat. In the half sections the west leads in total production and the north in average production per acre of corn and highest per cent. on condition of wheat.

## Ohio State Fair—1911

---

Herein printed are State Fair 1911 premium awards.

The Fair was a success, financially, as well as in attendance and number of exhibits.

Never before did exhibitors, as a whole, exert themselves so much to make the Fair attractive and educational as they did this year.

The Fair is growing. More ground and buildings are needed. In 1911 a fine new addition was built to the cattle barn. A new fire department building was constructed. And a new addition to the sheep building will be ready for use in 1912.

The overflow exhibits were greater than at any previous Fair.

Premiums were paid on the grounds at the State Fair Bank, which drew forth many words of commendation from the exhibitors.

The State Fair is becoming a great Middleman.

It is the place for those who have something to sell and the place for those who have something to buy. One firm is reported to have sold over one hundred thousand dollars' worth of goods.

Everybody makes good wages, if he wants to go about it in the right way, at the State Fair.

The exhibitors did their full share in making the Fair of 1911 a success.

Respectfully,

THE OHIO STATE BOARD OF AGRICULTURE.
